ABOUT

Detail-oriented and eager to learn Front End Developer primarily focused on implementation of distinctive and functional web applications which align with company and user requirements. Efficient in leveraging technologies including JavaScript, React, Redux, CSS/Sass and Node.js/Express. Actively seeking career opportunities within a company with shared values and objectives in the vibrant city of Stockholm, Sweden.

EXPERIENCE

DECARTO | SOCIAL MEDIA WEBAPP

JavaScript React Node.js Express MongoDB Sass

- Developed a MERN stack social media web application to enable artists sharing their work and get inspired by others.
- Created a sophisticated responsive UI with dark and light mode features using React and Scss.
- Utilized Node.js and Express for crafting functionality, including authentication, authorisation and user interactions(likes, following, creating posts).

FLOWER BOUTIQUE | E-COMMERCE WEBSITE

JavaScript Sass

- Built a user-friendly interface which is aligned with the brand identity and efficiently showcases products and their value.
- Leveraged JavaScript to implement e-commerce functions, therefore enhanced accessibility and convenience of purchasing process.

THE BIRCH SAUNA | WEBSITE

JavaScript React CSS

- Employed JavaScript and React to construct a fully-responsive website which allows users to obtain information about company services and to schedule appointments effortlessly and with ease.
